## TABLE OF CONTENTS

Introduction	INTRO - 1
Laboratory 0: Determining an Equation from a Graph	0 - 1
Laboratory I: Description of Motion in One Dimension	I - 1
Problem #1: Constant Velocity Motion	I - 3
Problem #2: Motion Down an Incline	I - 9
Problem #3: Motion Down an Incline with an Initial Velocity	I - 13
Problem #4: Motion Up and Down an Incline	I - 16
Problem #5: Mass and Motion Down an Incline	I - 19
Check Your Understanding	I - 23
Laboratory I Report Cover Sheet	I - 25
Laboratory II: Description of Motion in Two Dimensions	II - 1
Problem #1: Mass and the Acceleration of a Falling Ball	II - 2
Problem #2: Acceleration of a Ball with an Initial Velocity	II - 5
Problem #3: Projectile Motion and Velocity	II - 9
Problem #4: Projectile Motion and Mass	II - 12
Check Your Understanding	II - 17
Laboratory II Report Cover Sheet	II - 19
Laboratory III: Forces	III - 1
Problem #1: How Surfaces Affect the Kinetic Frictional Force	III - 2
Problem #2: Forces in Equilibrium	III - 6
Problem #3: Normal Force and the Kinetic Frictional Force (part A)	III - 9
Problem #4: Normal Force and the Kinetic Frictional Force (part B)	III - 13
Table of Coefficients of Friction	III - 17
Check Your Understanding	III - 18
Laboratory III Report Cover Sheet	III - 21
Laboratory IV: Circular Motion	IV - 1
Problem #1: Circular Motion and Acceleration (part A)	IV - 2
Problem #2: Circular Motion and Acceleration (part B)	IV - 5
Problem #3: Rotational Period and Force (part A)	IV - 7
Problem #4: Rotational Period and Force (part B)	IV - 10
Check Your Understanding	IV - 13
Laboratory IV Report Cover Sheet	IV - 15

Problem #1: Kinetic Energy and WorkV2Problem #2: Energy Efficiency of CollisionsV-5Problem #3: Energy in Collisions When Objects Stick TogetherV-8Problem #4: Energy in Collisions When Objects Bounce ApartV-11Problem #5: Power and the Human BodyV-11Check Your UnderstandingV-17Laboratory V Report Cover SheetV-19Laboratory VI: MomentumVI-1Problem #1: Perfectly Inelastic CollisionsVI-2Problem #2: Elastic CollisionsVI-5Problem #3: ExplosionsVI-5Problem #3: ExplosionsVI-12Laboratory VI Report Cover SheetVI-15Laboratory VII: Torque and EquilibriumVII-1Problem #1: Designing a MobileVII-1Check Your UnderstandingVII-1Problem #1: Measuring Spring ConstantVIII-1Problem #1: Measuring Spring ConstantsVIII-1Problem #3: Oscillation Frequency of an Extended SystemVIII-1Problem #3: Oscillation Frequency of an Extended SystemVIII-1Problem #4: OscillationsVIII-1-Problem #3: OscillationsVIII-1-1Problem #3: OscillationsVIII-1-1Problem #3: Oscillation Frequency of an	Laboratory V: Energy	V - 1

## Acknowledgments

The authors would like to thank all the people who have contributed to the development of the exercises and appendices used in this laboratory manual:

Jennifer Blue Heather Brown Dave Demuth Andrew Ferstl Tom Foster Kaiyan Gao Mun Chan Charles Henderson Vince Kuo Michael Myhrom Kevin Parendo Jeremy Paschke Hao Wang Jennifer Docktor

And all of the teaching assistants who helped to find the 'bugs' in these instructions.

Kenneth & Patricia Heller
